

Index

(Page numbers in *italics* indicate material in figures or tables.)

A

- Achievement-ability discrepancy, 50, 52, 66, 67
- Addition problems, inconsistent, 287
- ADHD. *See* Attention Deficit hyperactivity disorder (ADHD)
- Alexander, D., 3-4
- Allophonic variation of a segment of a word, systematic, 122-23
- Alphabetic principle, 162
- Arnbak, E., 251, 263-64
- Attentional disorders, 32
- Attention deficit hyperactivity disorder (ADHD), 32
- Auditory cues, reading disabled children's difficulty in processing, 77
- Auditory language skills, 32
- Auditory perception, reading disabled children and, 77
- Awareness of space, 315-16

B

- Blanton, L., 166-67, 170
- Blanton, W. E., 166-67, 170
- Blends, spelling of, 156
- British Births Cohort Study, 301, 303, 316
- Brooks, R. B., 2

C

- Chall, J., 4-5
- Classroom climate for students with learning problems, 18
- Class rules, 19
- Coda of a word, 123
- Cognitive abilities needed for reading skill, 50
- Consonants, doubling of, 158, 159

D

- Decision tasks, differing strategies for naming vs. lexical, 266-68
- Decoding, 163
- DeFord, D. E., 103-104
- Denckla, M. B., 232-33
- Development: normal range of, 33; selective impairments within otherwise normal, 33
- Developmental assessment, 28-29

- Developmental course of discrepant and nondiscrepant readers, 56-57, 58, 59, 60, 61
- Developmental impairment. *See* Specific developmental impairment
- Developmental profiles, 29-30; atypical, 31; dissociations in, 33
- Diagnostic Interview for Children and Adolescents (DICA), 55
- Diagnostic and treatment manual needed for educational disorders, 41
- Diagnostic and Statistical Manual for Mental Disorders*, 41
- Discrepancy groups within reading category, comparison of, 56
- Dyscalculia of the spatial type, 316
- Dyslexia, 21, 23, 24-25, 27-28, 34-35; defining, 36-40; IQ and, 34; neuroanatomical marker for, 36; prediction of, 205; preparation of teachers to instruct students with, 117; specific language disorder and, 32, 35-36; as a syndrome, 300; treatment for, 39
- Dyslexic students: difficulty with paired associate learning, 315; difficulty with some mathematics problems due to poor memory of, 314; distribution of weakness in mathematics among, 300; Friendly Maths Test and mathematical strengths and weaknesses of, 303; gender ratio of, 316; mathematics tasks and, 316; morphologically transparent words and, 251; most common weakness of, 169; performance on Friendly Maths Test, 310; spelling difficulties of, 168-70; weakness of (in mathematics), 313

E

- Educationally handicapping conditions, problems with, 42
- Educators. *See* Teachers and educators

- E, silent (or final), 130
 Elbro, C., 204, 251, 263-64
 Executive functions, 32, 37
- F**
 Failure, lessening students' fear of, 19
 Fast ForWord (FFW) program, 73, 81, 82; auditory processing skills and, 78; disadvantages of, 92; improving language skills and, 89-92; reading and, 88-89; results for students in Orton-Gillingham and control programs compared to results for students in, 85, 86, 87; spoken language gains and, 90
 Feelings of low self-worth, interventions and, 9
 Final e, 130
 FMT. *See* Friendly Maths Test (FMT)
 Four Factor Index of Social Position, 55
 Fowler, A. E., 204
 Friendly Maths Test (FMT), 303, 304-307, 308; skill in reading and, 310; skills measured by, 311
- G**
 Gating paradigm, 206
 Geary, D. C., 279
 Good readers, predicting, 194
 Goswami, U., 124
 Grapheme-phoneme relationships, 197
- H**
 Hanna, P. R., 150-51
 Hyperlexics, 35
- I**
 Interventions in spelling, impact of brief, linguistically informed, 126
 IQ, dyslexia and, 34
 IQ-achievement discrepancy, 21, 23, 27, 28, 67
 IQ tests, 29; cultural differences and, 30; of reading-disabled students, 52
- K**
 Kindergarten, 185, 188, 198, 229; lasting effects (in spelling) of phonemic awareness activities in, 138
- L**
 Language, teachers' knowledge about the structure of, 99
 Learning, dyslexics' difficulty with paired associate, 315
 Learning differences, 14-15, 18-19, 40-41; biological factors in, 34; of dyslexics, 315
 Learning disabilities, 24, 25; assumptions about, 9-10; of atypically developing children, 31. *See also* Mental retardation
 Learning-disabled students, 67; gifted, 33
 Learning English orthography, 151-53; stages in, 153-60
 Learning profiles, 34-35
 Letter patterns in monosyllabic words, final, 121
 Letter-sound correspondences, 150, 163
 Letter strings, poor readers' sensitivity to "legality" of, 253
 Lexical decision tasks, 252-53; effect for transparency on, 263; performance on nonword items in, 268-70
 Lexical representation, distinctness of, 205
 Lindamood Auditory Conceptualization Test (LAC), 54, 80, 83-84
 Liquid sounds that follow a vowel, 125
 Literacy: importance of phonological awareness for development of, 223; mathematical, 278
 Lyon, G. R., 1-2
- M**
 McCloskey, M., 279
 Mainstreaming, 65-66
 Mathematical literacy, knowledge needed for, 278
 Mathematical problems: grade 3 as the stage where children learn to deal with more complex, 289; examples of consistent and inconsistent language in, 293-95; examples of just enough information in, 295-96; examples of not enough information in, 296-97; examples of not needed information in, 297-98; semantic structure in

- understanding, 279; steps beyond focusing on computation to solve, 290
- Mathematics education, NCTM approach to, 278-79
- Mathematics and reading disabilities, children with, 291
- Mathematics word problems: consistency and adequacy in language information in, 280-81; inconsistent addition problem, 287; inconsistent division problem, 287-88; to much or "not needed" information in, 281
- Memorizing words, 160
- Memory: compensating (in mathematics problems) for poor, 314; finding a word in, 253
- Mental retardation, 25-26; global impairment and, 30-31. *See also* Learning disabilities
- Metsala, J. L., 206, 207, 209, 213, 214
- Mirror writing, 315
- Mistakes, verbalizing fear of making, 19. *See also* Failure
- Moats, L. C., 100, 116, 170
- Moore, J. T., 150-51
- Morphological processing, phonological aspects of, 250
- Morphological structure of words, word recognition and, 252-54
- Morris, D., 165-67, 170
- Motivating students, 13
- Multisensory techniques for poor spellers, 171
- Multisyllabic words: stress in, 159; syllable segmentation of, 164
- N**
- Naming tasks, effect for transparency on, 263, 264
- Naming visually presented items, 232
- Nasal sounds that follow a vowel, 125
- National Council of Teachers of Mathematics (NCTM), approach of (to mathematics instruction and curriculum), 278-79
- National Institute of Child Health and Human Development, Reading Research Program of, 4
- Nelson, L., 165-66, 168
- Nonword repetition (NWR), 203, 207; to predict phoneme awareness, 224, 225; vocabulary and, 214, 225
- Nonwords: correct identification of illegal, 269; recognition by poor readers of legal letter strings as, 253; speed of responses to legal and illegal, 269-70
- Nowacek, J., 167
- Number processing, abstract internal representation in, 279
- Numbers in McCloskey's cognitive information approach to mathematics education, 279
- O**
- Onset of a word, 123
- Orientation period, 16-19
- Orthographic legality, sensitivity to, 260
- Orthographic patterns. *See* Spelling patterns
- Orthographic processing as a predictor of reading, 183-84
- Orthographic skills to predict reading comprehension, 195, 199
- Orthography, learning English, 151-53. *See also* Spelling
- Orton Award, 1-2, 3-7
- Orton-Gillingham program: compared to Fast ForWord, 79, 85, 86, 87, 92; effectiveness of, 83; phonemic awareness gains and, 90; word attack gains and, 90
- Orton, S. T., 154, 162-64, 168
- P**
- P. A. *See* Phonological awareness
- Parents, teachers' relationships with, 16
- Perney, J., 165-67, 168, 170
- Phoneme instruction, success of linguistically explicit, 142
- Phonemes: children's hearing of, 154; in English, 152; errors in representation of, 155; initial consonant, 154
- Phonemes in spoken words, difficulty in perceiving all of the, 123
- Phonemic analysis, 163
- Phonemic awareness: among dyslexics, 169, 204; effectiveness of combining training in alphabetic code, with training in, 90; emergence of, 194; Fast ForWord compared to Orton-Gillingham training to improve, 92; importance of phonics and, 98-99; predicting, 224; reading and, 180; reading disability and, 50, 51; trigger for development of, 204. *See also* Phonological awareness
- Phonemic awareness activities in kindergarten, 138

- Phonemic segmentation, 156, 181
- Phonics instruction for beginning and disabled readers, 165
- Phonological awareness (PA), 183, 184; development of, 212, 215; prediction of, 203, 215. *See also* Phonemic awareness
- Phonological deficits: poor reading comprehension and, 198; reading disabilities from, 250
- Phonological neighbors, spelling of, 126
- Phonological and orthographic characteristics of a word, using a systematic explanation of the interaction between, 126
- Phonological patterns, teaching the relationship between orthographic patterns and, 142-43
- Phonological processing, reading disabled children and, 76-77
- Phonological shifts, reading ability and oral production of words that undergo, 251
- Phonological similarity, focus on words grouped by, 142
- Phonological skills, predictive value of, 199
- Poor readers: comparison of early and late, 192-94; difficult-to-remediate vs. readily remediated, 66; failure to identify, 65; learning disability identification and treatment comparisons among, 62-63; multiple deficits in, 51; prediction of, 194; sensitivity to "legality" of letter strings, 253
- Poor reading, criteria for early and late, 186-87
- Prediction of reading. *See* Reading prediction
- Prediction studies using kindergarten children, 223
- Preschool language problems, 35
- Project RIME, 100-101
- Pronunciation of clusters and digraphs, teaching the, 126-27
- Pronunciation of complex words, strategies for, 271
- Pronunciation shifts: addition of suffix and, 250-51; between base and derived forms of a word, 250-51, 252
- Pronunciation of unfamiliar words, importance of students experiencing success in, 271
- Pupils. *See* Students
- Q**
- Quality of Phonological Representations (QPR), 206; measuring the, 206-208, 208-215, 215-19, 219-29
- R**
- Rapid automatized naming (RAN), 55, 84-85, 236; genetic and environmental factors influencing the relationship between reading and, 244, 245; reading performance and, 232-34, 245; reading prediction and, 244, 245
- Readers, comparison of good vs. poor, 63-65
- Reading: code instruction in, 147; developing word knowledge as key to, 153; phonemic awareness and, 180, 181, 226; phonological aspects of morphological processing and, 250; prediction of, 183-84, 222, 223; simultaneous instruction in spelling and, 143; spelling compared with, 135
- Reading ability, oral production of words that undergo phonological shifts and, 251
- Reading approaches and programs, evidence-based vs. unproven, 5-6
- Reading comprehension: late emerging, 35; phonological deficit and, 198; prediction of, 195, 199
- Reading development: assessment of, 33-34; third grade discrepancy status and, 49, 50-52, 52-56, 56-63, 63-68
- Reading disorders and disabilities: cognitive weaknesses and, 50; defining, 40, 63, 68; intervention and, 65-66; mainstreaming and, 65-66; multidimensional aspects of, 40; persistence of, 63, 65; phonological deficits and, 250; phonological complexities of derived words and, 263; phonological processing and, 76-77; processing of auditory cues and, 77; spelling difficulties and, 148; that are not dyslexic, 32
- Reading instruction, impact of advances in knowledge about (on teachers' knowledge), 116
- Reading prediction, 181-83; in grade one, 185; in grades 3 and 7, 186; for individuals, 197; in kindergarten, 185, 188; preschool, 185,

- 188; RAN and, 244, 245; syllable segmentation and, 182-83, 196, 197, 198
- Reading rate of children in grade one, 220
- Reading skills, children in early elementary school who fail to acquire basic, 98
- Remediation of poor readers, predicting ease of, 66
- Retarded students, reading levels of, 30-31
- Rhyme detection, 196, 197, 198; as a quick screening test in early to middle kindergarten, 198
- Rhyming tasks to predict reading, 182
- Rime-base analogies, ease with which children make, 124
- Rule learning, inaccuracies and, 157
- S**
- Samuel Torrey Orton Award, 1-2, 3-7
- School, students' memories of, 17-18
- Scientific Learning Corporation, 78, 81
- Slow learners, 26, 33
- Social-emotional needs of students, 11
- Sound-spelling associations, 173; teaching of, 142
- Sounds that follow a vowel, 125
- Spatial dysfunction in dyslexic children, 316
- Specific developmental impairment, 31-32
- Specific language disability, 26-27, 31-32, 34; dyslexia and, 35-36; neuroanatomical marker for, 35-36
- Spelling: junctural principles of, 158; memorization and, 149-50, 151; preschool weakness in, 196; progression of error types in, 152; and reading compared, 139; simultaneous instruction in reading and, 143; whole language approach and, 148. *See also* Learning English orthography; Orthographic headings
- Spelling "demons" that require memorization, 151
- Spelling difficulties: meeting with traditional materials, 165-67; reading difficulties and, 148
- Spelling errors, dyslexic, 163
- Spelling exceptions, 143
- Spelling instruction: developmental, 151-62, 171-72; impact of brief linguistically informed intervention in, 126; improving, 170-71; internal structure of the word and, 125; letter-allophone association approach to, 122; list learning in, 151, 167; onset-rime approach to, 127n; orthographic rime approach to, 127n; phonemic approach to, 122; rime in, 124; rime instruction compared to phoneme instruction and, 138; structured language approach to, 162-65, 168, 172; test-study-test approach to, 150; traditional approach to, 149-51
- Spelling lists, 167
- Spelling of monosyllabic words, 125, 130
- Spelling patterns: distribution of, 140-42; predictability in, 150; sensitivity to speech segments in a word and choice of, 142; sound patterns and, 173; teaching the relationship between phonological patterns and, 142-43
- Spelling system, three dimensions of, 152-53
- Spoken word recognition, 205
- Student outcomes, teachers' knowledge about how to teach reading and, 99
- Students: adjusting teaching to individual differences in, 14-15; development of resilience of, 12-13; discussing ways of learning with, 18-19; empathy for, 11-12; enhancing self-esteem of, 16; fear of failure and, 19-20; feelings of low self-worth and, 9, 20; increasing the motivation of, 16; learning names of, 18; meeting basic needs of, 15-16; social-emotional needs of, 11; special needs of, 20; unmotivated, 13; using strengths of, 19; with learning problems, 18
- Students' memories of school, 17-18
- Suffixes: adding, 158, 250; shift in pronunciation due to addition of, 250-51
- Syllable segmentation tasks to predict reading, 182-83, 196, 197, 198
- Syllable types, 163
- T**
- Tallal, P., 73, 76-79
- Teacher preparation: in the area of reading, 117; student outcomes and, 99;

- Teacher preparation (*continued*)
 teachers' perceptions of their own, 112-14, 115-16
- Teachers and educators: development of student resilience and, 12-13; empathy and, 11-12; knowledge about language and, 99, 109-111, 112, 114-15; mindset of effective, 10-11; the most effective, 117; perceptions about early reading and spelling and, 109, 111; perceptions about preparation to teach and, 112-14, 115-16; relationships with parents and, 16; social-emotional needs of students and, 11; students' words to describe, 17; willingness to innovate and, 116
- Teachers' estimate of their preparedness to teach reading, 103, 112-14, 115-16
- Temporal processing, difficulty with, 77
- Test of Auditory Analysis Skills (TAAS), 54
- Test-retest reliability, 224
- U**
- Unexpected spellings and pronunciation, help in remembering, 271
- V**
- Verbal ability: low, 35; predictive value of, 199
- Visually presented items, naming, 232
- Visually similar sequences of letters and numerals, preschool accuracy in distinguishing among, 195
- Vowel diphthongs, 158
- Vowels, 155; long, 157; short, 156
- W**
- Wechsler Intelligence Test for Children-Revised (WISC-R), 53-54
- Whole language approach, spelling and, 148
- Woodcock-Johnson Psycho-educational Battery Reading Cluster (WJBP), 54
- Word formulas, exposure to rime approach with, 122
- Word frequency, spelling instruction and, 149
- Word identification, 90
- Word knowledge, 167-68
- Word naming task, morphological processing in reading morphologically complex words and, 252
- Word recognition: differences in depth of processing in, 268-70; morphological structure and, 252-54
- Words: aural input for identification of, 206; experience to develop mental representations of, 271; finding memorized, 253; Greek and Latin roots of, 160; grouping by phonological similarity, 143; initial consonants as clues to recognition of, 154; morphologically complex, 250; morphologically transparent, 251; onset of, 123; poor readers' slow reading of shift, 265; pronunciation of consistently spelled, 143; recognizing nonpermissible letter combinations, 261; rote memorization of, 160; speed of responding to legal nonwords and to illegal, 261; spelling of shift and stable, 264; stress in multisyllabic, 159; stored in memory, 154; syllabic segmentation of multisyllabic, 164
- Words grouped by phonological similarity, focus on, 142
- Word sorts, 171
- Word study, 161-62; that focuses on morphemes, 271
- Writing disorders, 32-33
